

## Display Options for Bed Cards (Joy of Plants, at February 2025)

(Information is provided in good faith, but you use it at your own risk – be sure to try out your preferred solution before committing to larger scale purchases.)

There are different types of display units:

- 1) For **benches** – plastic "tracking", or frames, that screw or clip onto benches. **Most economical.**
- 2) **Free standing** – frames with stands, to sit on table tops, benches or the ground, behind or in front of plants. Fixed height and telescopic versions available.
- 3) **Screw down stands** – frames with stands, that are screwed to table tops or benches (very useful for windy sites)
- 4) **Stakeholders** – frames on spikes, to stick in the ground or into pots (very useful if your staff move plants around a lot)
- 5) For **Danish Trolleys** – frames that clip onto the side of a Danish Trolley (allowing you to use the trolley as the display stand)

Tips:

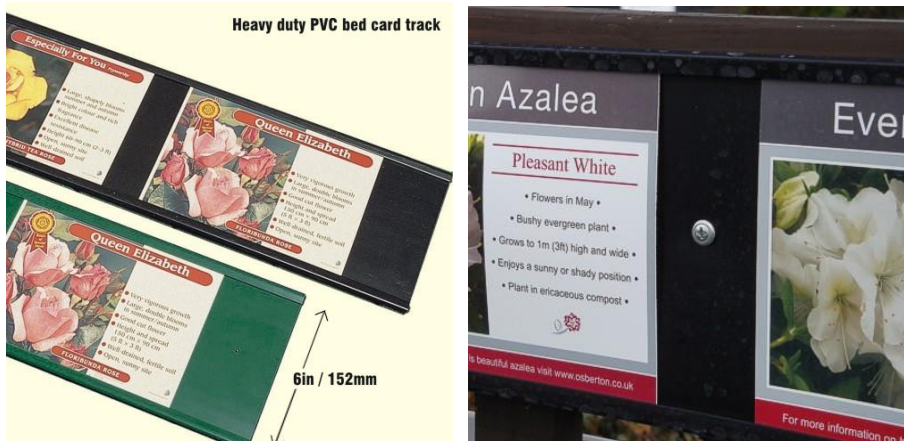

- Bed cards displayed at an angle may fade more quickly than those displayed on the vertical. If bed cards do fade during the season eg due to very exposed sites and/or printer & ink combination, print two copies of the bed card, put both in the holder, and if/when the front one fades, just remove it.
- When using Green Magic "slim frames" to display bed cards, to ensure consistent positioning of bed cards within the frames, make sure that the "openings" of the frames all face the same direction, e.g. all openings face to the right. Bed cards sit differently when slotted in from the left than when slotted in from the right.

Note: Tyne Moulds, a manufacturer below, will identify local sellers of their products for you.

### **Benches: Green Magic "Bed Card Label Track"**

**Bed card size: 8"x6" Suitable for:** wooden benches

**Not recommended for laminated** bed cards: *can* work with 8"x6" lamination pouches & smaller cards, either trimmed after printing, or on custom-sourced paper with a custom template. (A5 pouches are bigger than A5, and if taller than 6", may bow outwards and blow away.)

Tips:

- Screw to back of benches at eye level for maximum readability

**Suppliers & cost:** Green Magic, at [sign-holders.co.uk](http://sign-holders.co.uk)
